Contained in this archive (ZIP) file are the following:

- Thilmany_MaxDaily.txt
[AERMOD Output from the MAXDAILY keyword]

- Thilmany_MaxDaily_toUSEPA.xlsx
[Excel spreadsheet containing the calculation of ranked sums that were plotted in the Addendum]

- Thilmany_Model_4Monitor_Max.dat
[AERMOD input file of the highest 200 NDV receptors]

- thilmany_model4monitor_max.out
[AERMOD output file for the highest 200 NDV receptors]

The MAXDAILY file was imported to Excel and then a PivotTable and IF statements used to count the number of days, but the file size would not allow for email transfer. The version in this archive keeps the values from the PivotTable and the IF statements, but does not contain the MAXDAILY data. The MAXDAILY text file compresses down enough to email, and can be locally imported for review.
